

Larry Layer

Here's what Larry Layer has to say:

Larry Layer Trucking uses Temp-A-Start because...

"It saves the company about \$10,000 per year! Temp-A-Start is a patented proven effective automatic start/stop system for diesel trucks."

"A small operation like mine must find ways to hold down costs. I have been using Temp-A-Start since 1988 and know from experience that it saves about \$2,000 annually on each of my five trucks. I will never own another truck without Temp-A-Start and anyone who does not take a serious look at the potential savings with this system is making a big mistake."

Take it from Larry Layer, It's worth it to contact Temp-A-Start Today!
